

# should i stay OR GO?

what to do when sick

**STAY HOME** if you have had any of these signs in the last 24 hours:

Nausea, vomiting, or diarrhea

Too sick for regular activity or a fever, above 100° F

Green or yellow pus or weeping- see your doctor

Temperature is 100° F- oral, or 100.4° F- ear, forehead, or rectal

Fever, chills, muscle pain, cough, headache, very tired

Skin is red, itchy, or if fluid is draining

Pain along throat or hard time eating- see your doctor

**GO BACK** to school or work, when without signs or on medication for 24 hours:

Vomiting and diarrhea have stopped

Fever is gone and you feel better

After following directions from doctor

Normal body temperature returns, around 98.6° F

Fever gone and energy is back

Rash is gone, or doctor says OK

If antibiotics are used, wait 24 hours before going back
